

Residential Free-Standing Rack

For Rinnai Tankless Water Heaters and Boilers

A Simple “Standalone” Solution for Indoor Installations

Compatible with the Rinnai SENSEI™ Tankless Water Heater, I-Series, and M-Series Condensing Gas Boilers, the racks provide a simple mount solution for interior installations in residential applications. The new free-standing rack is offered in two options: Standard and Low Profile. Powder-coated gray and built with commercial-grade steel square tube, the racks deliver the durability and quality you've come to expect from Rinnai.

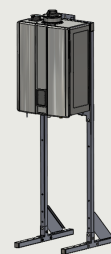

Both the Standard Rack and Low Profile Rack can be configured to mount either one unit on the front or two units back-to-back on opposite sides of the rack.

Components in the box are pre-assembled to help minimize assembly time in field saving cost and down time.

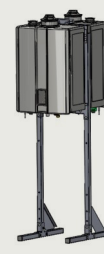

Add-On Extension Kit

If using the Add-On Extension Kit, the width of the rack can be extended to accommodate the installation of either two units (side by side) on the front only or four units (side by side) using both the front and back of the rack. A Standard or Low Profile Rack is needed with the add-on extension kit.

STANDARD RACK

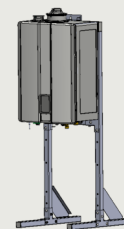

1-Unit

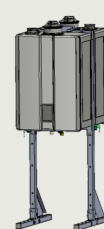

2-Units Back-to-Back

LOW-PROFILE RACK

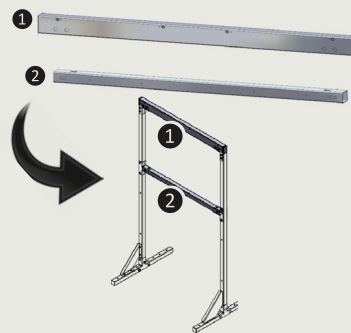

1-Unit

2-Units Back-to-Back

ADD-ON EXTENSION KIT
